DATA ANALYST

Analytical professional with a strong foundation in mathematics, statistics, and sports analytics. Experienced in collecting and analyzing large-scale player tracking data leveraging Trackman and R. Combines hands-on experience using statistical and analytical software with a mathematical and statistics background to identify trends, and support decision making.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC
Master of Science in Business Analytics – Sports Analytics Concentration, *May 2027*

Appalachian State University, Boone, NC
Bachelor of Science in Mathematics – Statistics minor – Sports Analytics Certificate, *May 2026*

- Chancellor's List (3.85 or higher) 8 of 8 semesters; 4.0 GPA in major and minor classes
- Pi Mu Epsilon, National Mathematics Honors Society, inducted spring 2026

AREAS OF EXPERTISE

Leadership | Problem-Solving | Communication | Time Management | Data Visualization | Statistical Analysis | Sports Analytics | Sports | Data Storytelling | Visual Data Presentation | Adaptability Under Pressure | Sports Domain Knowledge

TECHNICAL SKILLS

Programming Languages: Python, SQL, R
Microsoft Office: Microsoft Word, Excel, PowerPoint
Data Analysis & Experimental Design: Exploratory Data Analysis (EDA), Experimental Design, A/B Testing
Analytical Software & Tools: Database Management: PostgresSQL
Google Cloud (GCP): Colaboratory
Tracking Software: Trackman

PROFESSIONAL EXPERIENCE

SPORTS ANALYTICS PRACTICUM | **Wake Forest Football Team |** Winston-Salem, NC *October 2026 – Present*

- Working with a small team to complete requested analytics projects from the team

ANALYTICS TEAM MEMBER | **Wake Forest University Baseball Team |** Winston-Salem, NC *August 2026 – Present*

- Managing real-time Trackman and KinaTrax player-tracking data during games and practices, auditing pitch, batted-ball, and fielding metrics to guarantee perfect data integrity for coaching staff.
- Building a model to predict how far batted balls travel based on launch conditions and other potential variables.

TECHNOLOGY OPERATOR | **Durham Bulls, Tampa Bay Rays AAA Affiliate |** Durham, NC *March 2026 – September 2026*

- Managed real-time Trackman player-tracking data during games, auditing pitch, batted-ball, and fielding metrics to guarantee perfect data integrity for coaching staff.

INTERNSHIP| **Prep Baseball Report |** Kansas City, KS *May 2025 – July 2025*

- Produced real-time Trackman tracking technology across various youth tournaments throughout the summer to deliver precise performance reports to scouting staff.
- Collaborated with Prep Baseball scouts to capture high-definition game footage, producing player highlights that boosted prospect visibility for collegiate and professional recruiters.

INTERNSHIP | **Appalachian State University Baseball Team** | Boone, NC *February 2025 – May 2026*

- Analyzed practice and game data points for ASU Division I baseball using R and Trackman, building statistical reports that optimized coaching strategy and player performance.

CLIMBING WALL OPERATOR | **Appalachian State University** | Boone, NC *September 2023 – May 2026*

- Supervised daily operations and safety protocols for a climbing facility, conducting wall inspections, managing gear inventory, and instructing climbers on risk management to ensure an injury-free environment.

ANALYTICAL PROJECT EXPERIENCE

5v5 Scoring Trends in the NHL: Analyzed NHL data from 2007 to 2019 in order to analyze scoring trends over that time frame. Utilized R to create visualizations to better understand and identify different patterns and trends over this ten-year span.

Ranking College Football Teams: Applied game data from the first eleven weeks of the 2025 football season and a points system to rank college football teams. Developed predictions for the following week based on team rankings and then compared predictions to the actual result.

The Long Change in the NHL: Used data from the 2023-2024 NHL season to explore the impact of the long change in the second period on various hockey metrics. Utilized various visualizations to make comparisons and draw conclusions about the overall impact of the long change.
